

• AC POWER CORD OF THE YEAR

Audience Au24 powerChord

\$2200 (6')

A power cord that touches all the right bases. Its neutrality, low noise floor, and almost preternatural retrieval of spatial and ambient information are what you would expect in a TAS Product of the Year Award winner. But the Au24 also offers a strong sense of micro-resolution, honing in on sonic images with incisive focus and reproducing them with seemingly effortless immediacy. Last but not least, the Au24 powerChord is one of the more flexible high-end cords available, making it very handy for angled runs. *Neil Gader, The Absolute Sound (219)*
